INVITATION

In our capacity as members of the Organizing Committee of RECOGYN 2024, we, on behalf of our President & Scientific Chairman, Professor Navneet Magon are pleased to welcome you to this mega event, the 3rd World Congress of Reconstructive & Cosmetic Gynaecology, being organized by The Society of Cosmetic Gynaecology, India (TSCG). We are very pleased to share with you that the Congress shall be the assembly of outstanding leaders in the field with renowned speakers from across the globe on the faculty. Professor Stefano Salvatore, Head of Urogynaecology from San Raffaele, Milan, Italy who is the current Dean of the European College of Cosmetic Gynaecology, is the International Scientific Advisor for RECOGYN 2024.

India has become the birthplace of Cosmetic Gynaecology by establishing the world's first university division of Reconstructive & Cosmetic Gynaecology and instituting the first post-doctoral M.Ch. fellowship program in Cosmetic Gynaecology globally at AIIMS, Rishikesh, under the leadership of our President, Professor Navneet Magon, who has been the Founder Head of the Division of Reconstructive & Cosmetic Gynaecology and is also the President & Scientific Director of this World Congress apart from being the Founder President of TSCG. Therefore, it becomes obvious that RECOGYN shall cover the progress of Cosmetic Gynaecology as well as go in depths of the academic-scientific-clinical facets of this youngest but most futuristic subspecialty of Gynaecology.

RECOGYN 2017, which was the 1st World Congress of Reconstructive & Cosmetic Gynaecology helped Cosmetic Gynaecology get universal acceptability, support and respect of the scientific community and accolades for its high scientific clinical standing. Thereafter, RECOGYN 2022 has been the largest Cosmetic Gynaecology Congress ever organized in the world. This congress distinguishes itself from other congresses in the world that it concentrates on the scientific clinical aspect of Reconstructive & Cosmetic Gynaecology. The congress program of RECOGYN 2024 shall stand testimony of the same, and an indicator of what the congress has in store. The Congress also offers very exciting and relevant pre-congress workshops which are essentials for any one practicing Cosmetic Gynaecology to be included in their skill armamentarium. Indian College of Cosmetic Gynaecology (ICCG), European College of Cosmetic Gynaecology (ECCG), Indian Institute of Reconstructive & Cosmetic Gynaecology, American College of Cosmetic Gynaecology (ACCG), International Master Course on Aging Science (IMCAS) and Urogynaecology & Pelvic Health Association of India are the international scientific partners for this congress. Many other respected and learned academic societies and associations from different continents in the world shall be the participating societies in the congress.

The venue for RECOGYN 2024 is The Westin Gurgaon, New Delhi, which is one of the most magnificent conference venue in the national capital region of India. The Congress shall have a very exciting social evening program with the Gala Dinner Nite packed with Fashion Show, Indian Cultural Dances, ICCG Ceremonial Convocation, Dance with DJ, 5 Course Dinner, Choicest drinks and of course a networking opportunity like never before with many more surprises.

For the benefit and convenience of the ICCG Grads, the doctors who are trained & certified by ICCG (which is the academic wing of TSCG), ICCG has announced the membership examination for MICCG on morning of 27 September 2024, so as to suit the participants who shall be coming to attend RECOGYN 2024 from far away areas to also take the membership examination simultaneously.

With confirmed best and the brightest speakers from Americas, Europe, Africa, Australia and Asia, the conference would be providing ample opportunity for researchers, clinicians and professionals to not only share information, but also to establish a network essential for future collaborations with people across the globe. Delegates are expected not only from the Indian Sub-continent but also from all continents of the globe since this congress shall be a unique opportunity in skill building for the participants. The Congress has already generated intense interest in the gynecologists, plastic surgeons and dermatologists from across the globe and the prominent specialists from the whole world would be seen in this congress, majority of course from the host nation, INDIA.

RECOGYN 2024 would give you an opportunity to have access to potential Key Business leaders and Key Opinion leaders in the specialty, because the best and brightest minds and the pioneering surgeons who are the leaders in the specialty are going to be there. Finest of Gynaecologists, Plastic Surgeons and Dermatologists would be attending RECOGYN 2024, and industry & entrepreneurs shall have an opportunity to present their products to them, and influence their decision making by presenting the best scientific advances. Industry may block booths and other sponsorship opportunities at the RECOGYN 2024 to ensure a place for themselves, their company and their products in the best and brightest minds in the specialty. RECOGYN 2024 is the perfect platform for you to make your business and relationship grow in the specialists who matter, and more so in the ones, who would matter in the future.

The Society of Cosmetic Gynaecology is hosting RECOGYN 2024 jointly with ICCG and we solicit your presence in promoting science and adding new skill to the armamentarium of the Gynaecologists & all other medical doctors who are healthcare providers for women.

2024 is the YEAR of RECOGYN.
Be THERE!
